

Pennsylvania-based mechanical contracting company makes safety records more accessible.

Field workers can **present all relevant safety information in less than**

**1 Second.**

Learn how the Smart Badge is changing this 105+ year old business.

**All worker safety info on 1 badge.**

myComply

# Background

Kassie Koser is the Safety Director at Wm.T. Spaeder, a large multi-industry mechanical contractor in Pennsylvania. Kassie manages the safety for her company, and is responsible for ensuring that her team is compliant on the many projects and sites they work on.

Founder, William T. Spaeder, launched the business back in 1914 in Erie, PA. As a result of decades of hard work, this grassroots, family-owned and operated company has earned a reputation for world-class institutional and mechanical contracting services, as well as exceptional customer service. Kassie's work continues to grow the company into a safety-driven organization that is not afraid to innovate.

## Objective

Wm. T. Spaeder was looking for **a simple way for their workers to always have safety information present.**

*"When I started researching into the Smart Badge I knew it was the right solution for us. We have a lot of service technicians that go into different facilities alone and are required to have a badge in the first place. If it's a hospital or health care facility, for example, they may need to have their vaccination records readily available."*

**- Kassie Koser, Safety Director, Wm.T. Spaeder**

# Safety Info is Always Present

*"We were looking for something much simpler, one that could be accessed by our foreman remotely. Then we found myComply."*

**- Kassie Koser, Safety Director, Wm. T. Spaeder**

## Accessible at any time, anywhere.

When searching for a solution to store, track and manage safety documentation Wm. T. Spaeder found myComply through their affiliation with Procore.

# PROCORE®

**The initial problem Wm. T. Spaeder was looking to solve revolved around accessibility.** Safety records are not always accessible, organized, or easy to carry to every job site.

Koser spent time reviewing various solutions, but identified the Smart Badge as a solution that addressed her team's issues. The Smart Badge allows Koser better oversight with her team, and her field workers to always have their safety information present.

# The Badge

*"For us, a Smart Badge is useful on a project because it allows us to verify their credentials before operating certain machinery or equipment on-site to ensure they are qualified/trained to perform certain tasks."*

**- Kassie Koser,  
Safety Director,  
Wm. T. Spaeder**

## Custom Branding

Order your Smart Badge the way you want it!  
Consult with the design team to add your logo & colors.

## Near-Field Communication (NFC) Enabled ID Badge

NFC badges are durable and stand the test of time, unlike other technology that use barcodes or QR to display information.

## Easily Read Badges With Your Phone

Smartphones can view a worker's safety information immediately using the 'myComply Badge Scanner' app.

# How it works

All worker safety info on 1 badge.

*"With the Smart Badge, we're able to essentially scan [workers] and pull all of that critical information. It allows them to have everything at their fingertips, and it allows us to stay in compliance with our customers by presenting those credentials on demand."*

**- Kassie Koser, Safety Director, Wm. T. Spaeder**
